**Natalie Jones**

Technical Recruiter, TAL Group

Dear Mrs. Natalie,

I am writing to express my interest in interviewing for the position of Full Time Full-Stack developer.

During my 7 years of experience as a full-stack Web Developer, I have developed both the functional and aesthetic components of client websites.

I believe I can make an immediate impact on your organization with my unique blend of skills and passion.

My professional experience includes using programming languages such as HTML, CSS, and JavaScript to create various features for client websites. I also have experience in developing and managing SQL and PSQL databases.

Combine this with my ability to thrive in a collaborative environment, and I think that makes me a perfect fit for the future position.

Here are some highlights of my accomplishments as a Web Developer:

- Successfully collaborated and efficiently communicated with project stakeholders to bring their vision to digital reality
- Earned a BS.Sc, MS.Sc in Computer Science from the University of Toronto
- Developed databases using SQL/PSQL proficiency
- Tested and troubleshooted all Web functions to ensure the optimal user experience

My experience summary

---

<https://www.workspacegeek.com>

Workspace Geek is cutting edge software that I built to replace an existing, legacy system. I built Workspace Geek from the ground up using .NET Core and Angular 7.

The previous legacy system was built with AngularJS and my client asked me to migrate into Angular 7.

The website was built using best practices in agile development (scrum) and the latest technologies. I was a full-stack developer for Workspace Geek and completely handled the whole development process.

My extensive knowledge of programming languages, Computer Science, and the principles of web design make me equipped to accelerate the project progress toward their goals. I look forward to discussing this position further in an interview.

Thank you for your consideration.

Sincerely,

**Tyler Chong**
